#08 DRYER MOTOR TESTER

Warning: Only to be used by a qualified technician. Improper use or connections may cause electrical shock hazards. Read and follow instructions carefully, and take all precautions to avoid electrical shock hazards. Be sure that all associated devices are properly grounded before energizing circuits.

Tests dryer motor for ability to run and checks contacts 1 and 2 for heat (light glows).

Instructions:

1. Remove machine harness wires or molex plug from motor
2. Connect tester to corresponding numbers for tester to motor
3. Plug tester into Main Unit #00 and turn switch ON
4. When the motor starts the indicator on #08 Tester will glow, confirming the heat switch & motor are both OK.
